

# INTERNATIONAL OUTREACH

JUNE 2023

**The Centre for Connected and Automated Transport (CCAT) is a collaboration of government, industry, academic and community organisations with a common interest in facilitating Australia and New Zealand's transition to connected and automated transport.**

## **INTERNATIONAL OUTREACH**

The global autonomous vehicle industry is expected to be worth \$US2,000 billion by 2030, according to market research giant Allied Market Research.

Locally, the economic benefits for Australia from the connected and automated transport sector are estimated to be \$A95 billion per annum, including the creation of 16,000 jobs and saving more than 1,000 lives and preventing many more serious injuries on our roads.

CCAT's International Outreach will enable senior leaders from Australia and New Zealand to gain an in-depth understanding of the development and deployment of connected and automated technology, legislative processes and how next generation infrastructure will all support the way in which we build tomorrows' transport future.

### **Objectives**

Expose an Australasian audience to emerging technology, business models and infrastructure across road and other transport modes.

Understand what direction is being taken by governments and industry leaders.

Establish key contacts and linkages for future collaboration.

Bring learnings back to Australia and New Zealand to help us prepare our transport systems.

---

### **Who Will Be Attending**

Chief executives of transport agencies, chief engineers from transport agencies and industry, private sector executives from manufacturing, digital and physical infrastructure provision, insurance and logistics.

# PROGRAMME

The CCAT International Outreach is an opportunity to immerse yourself in a cutting-edge innovation and technology driven European study tour, meeting global figures in the transport industry and visiting advanced manufacturing facilities.

Also included in the outreach program will be discussions with elected Members of Parliament about the policy drivers and challenges in a connected and automated transport future. The International Outreach ends with the Power2Drive Exhibition which will connect attendees with the next generation of charging infrastructure and e-mobility providers.

## London

**5-7 June**

Engage with global consultancies and government officials, and see innovative trials

## Stockholm

**8-9 June**

See demonstrations and discuss transport solutions with global vehicle manufacturers

## Berlin

**12-14 June**

See advanced transport systems across different modes

## Munich

**15-16 June**

Power2Drive Exhibition

# POWER 2 DRIVE | EUROPE

The International Outreach will end at the **Power2Drive Exhibition** in Munich. CCAT recognises the interaction of electric and automated transport technologies. The Power2Drive Exhibition is an industry hotspot for suppliers, manufacturers, distributors and start-ups in the emerging field of electric mobility and transportation. Attendees will see first-hand the next generation of charging infrastructure and technologies for electric vehicles, and gain a better understanding of the interaction between electric vehicles and a sustainable future transport system.

## Registration Fee

Approx. \$25,000

## Overview of what's included

- Airfares & taxes, intercity train tickets
- Airport transfers
- Accommodation
- Breakfast and dinner (except for during free time)
- On-ground logistics and coach transport for meetings
- Power2Drive Exhibition tickets

## Register your interest
